

STUDENT NAME:

EARLY YEARS, YOUTH WORK AND EDUCATION

Working with children and young people is a hugely rewarding career. Every child is unique, every family different, and no two days are ever the same. There is always a demand for high-quality care professionals and our courses can help you get the skills and qualifications you need to start your career.

Our childcare courses cover a wide range of subjects ranging from safeguarding children, forest schools and children's development.

A big part of how children learn is through play, and this means children are continuously exploring, investigating, and finding out about the world around them. One way in which we can support children's learning is by enhancing their imaginations by creating fairy gardens.

A Fairy Garden is a miniature garden with actual living plants. It is designed to lure fairies to give them a place to live.

You can create your own design and the things you put in it can be anything, let your imagination go wild!

You can use space at the bottom of the garden or in a tub. Use pebbles, shells bits of twigs... the list is endless.

Children will enjoy exploring a fairy garden, using their imagination to become absorbed in their play. They are learning new skills and developing their holistic learning; physical, intellectual, Language, Emotional and social skills.

Children are creating their own play space, which relates to British values and valuing children's opinions.

'FAIRY GARDEN' ACTIVITY

Create your own fairy garden. There is no other direction to this other than we want you to take a photograph of your creation with a written description on how you would describe the garden to a child. Email your completed fairy garden to applicants@knowsleycollege.ac.uk.

Every applicant that returns work will be entered into a prize draw to win a £50 Love to Shop voucher.

Have fun creating your very own fairy garden!

Stay safe and we look forward to you joining us on Childcare in September.
